

SATHISH G

Java Full Stack Developer

Chennai • +91 9944845817 • sathishgmr26@gmail.com • LinkedIn • GitHub • Portfolio

PROFESSIONAL SUMMARY

Software Developer with approximately 3 years of experience designing, developing, and maintaining enterprise-grade applications using **Java**, **Spring Boot**, **Spring MVC**, **Spring Data JPA**, **Hibernate**, **REST API s**, and **Micro-services** architecture. Experienced in implementing secure APIs with **Spring Security** and **JWT** authentication, integrating third-party services, and working with relational and NoSQL databases including **MySQL** and **MongoDB**. Contributed to production-grade NBFC platforms covering loan processing, insurance, and collections workflows in an Agile/Scrum environment. Actively building full-stack applications using **React.js**, **Docker**, and **AWS** through independent development. Strong focus on clean architecture, scalable backend systems, and production-ready solutions.

TECHNICAL SKILLS

Languages	Java (8, 11, 17), SQL, JavaScript
Backend	Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Security, JWT Authentication
Microservices	Microservices, API Gateway, Eureka Service Registry, OpenFeign, WebClient, Saga Pattern, Resilience4j, Rate Limiting, Kafka
Frontend	React.js, Vite, HTML5, CSS3, JavaScript, Bootstrap
Databases	MySQL, MongoDB, Redis
Core Concepts	REST APIs, OOP, SOLID Principles, JDBC, JSP, Servlets, ORM, Log4j
DevOps & Cloud	Docker, Jenkins, GitHub Actions, AWS, Nginx, Apache Tomcat, Jetty
Tools	Maven, Postman, Swagger/OpenAPI, SonarQube, Git, GitHub, TortoiseSVN, JUnit, Jira, Eclipse, VS Code
Methodologies	Agile, Scrum, SDLC

PROFESSIONAL EXPERIENCE

Java Full Stack Developer

June 2023 – September 2025

DVARA KGFS Pvt Ltd | Chennai (2 Years 3 Months)

- Developed and maintained scalable backend modules using **Java**, **Spring Boot**, and **Spring Framework**, applying clean layered architecture principles across multiple enterprise application modules.
- Designed and implemented **RESTful APIs** supporting core NBFC business workflows — customer onboarding, loan processing, insurance enrollment, collections, and payment services.
- Built and enhanced **microservices**-based applications using **Spring Cloud** components: **Eureka Service Registry**, **API Gateway**, **Config Server**, and **OpenFeign** for reliable inter-service communication.
- Implemented API security using **Spring Security** with **JWT**-based authentication and role-based authorization to enforce access control across all application services.
- Integrated third-party APIs for customer KYC verification, SMS notifications, insurance services, and payment-related workflows.
- Designed and optimized **MySQL** and **MongoDB** schemas, queries, and persistence logic using **Spring Data JPA** and **Hibernate**; applied **Redis** caching to reduce database load and improve API response times.
- Troubleshooted and resolved production issues through log analysis, API testing, database investigation, and root-cause identification; executed deployment validation across Development and Sandbox environments using **Jenkins** CI/CD pipelines.
- Deployed and maintained web applications on **Apache Tomcat** and **Jetty** servers; collaborated with Business Analysts and QA teams in **Agile/Scrum** workflows including sprint planning, stand-ups, reviews, and retrospectives.

Independent / Freelance | Chennai

- Independently design, develop, and maintain full-stack applications using **Java**, **Spring Boot**, **REST APIs**, **React.js**, **MySQL**, and **Docker** — managing end-to-end development from requirements through deployment.
- Design application architecture, implement backend services, develop RESTful APIs, and build responsive **React.js** frontend interfaces for personal and portfolio projects.
- Practice real-world development workflows: **Git** version control, API testing with **Postman**, **MySQL** database schema design, **Docker** containerization, and application debugging.
- Maintain active project repositories on **GitHub** as evidence of continued technical skill development and hands-on software engineering practice.

PROJECTS

Loan Processing System — JLG, Enterprise & Personal Loans

Centralized NBFC loan management platform covering customer onboarding, loan origination, approvals, disbursement, repayment tracking, and portfolio monitoring. Developed during professional employment at DVARA KGFS Pvt Ltd.

- Built backend services using **Java**, **Spring Boot**, **Hibernate**, and **JPA** to support end-to-end loan lifecycle management across JLG, enterprise, and personal loan products.
- Architected a **microservices** ecosystem using **Eureka Service Registry**, **API Gateway**, Config Server, and **OpenFeign** for scalable inter-service communication.
- Designed and implemented **RESTful APIs** for customer onboarding, KYC verification, loan applications, approval workflows, disbursement processing, and repayment tracking.
- Secured all APIs using **Spring Security** with **JWT**-based authentication and role-based authorization; integrated third-party APIs for customer verification, SMS notifications, and external services.
- Optimized **MySQL** and **MongoDB** data models for high-volume transactional workloads; applied **Redis** caching to reduce database load and improve response times.

Tech Stack: Java • Spring Boot • Spring Security • JWT • Hibernate • JPA • REST APIs • MySQL • MongoDB • Redis • Microservices • Eureka • API Gateway • OpenFeign • Jenkins • Maven

Insurance & Collections System

Integrated NBFC platform managing insurance enrollment, policy servicing, claims processing, collections, and recovery operations. Developed during professional employment at DVARA KGFS Pvt Ltd.

- Delivered backend services using **Java**, **Spring Boot**, **Hibernate**, and **JPA** to support insurance enrollment, policy servicing, claims processing, and collection workflows.
- Developed **Spring Boot microservices** with **Eureka Service Registry**, **Spring Cloud Gateway**, and Config Server for centralized service management and configuration.
- Designed and implemented **RESTful APIs** for policy servicing, claims processing, collection activities, and repayment tracking; secured all services using **Spring Security** and **JWT**.
- Integrated third-party services for customer verification, notifications, and payment-related processing; collaborated with cross-functional teams to test, troubleshoot, and maintain service integrations.
- Optimized database queries using **Spring Data JPA**, **MySQL**, and **MongoDB**; applied **Redis** caching to accelerate API response times for insurance and collections data.

Tech Stack: Java • Spring Boot • Spring Security • JWT • Hibernate • JPA • REST APIs • MySQL • MongoDB • Redis • Microservices • Eureka • Spring Cloud Gateway • Jenkins • Maven

E-Commerce Web Application (Independent Project)

Full-stack e-commerce application for managing clothing products, inventory, shopping cart, and customer orders — built as an independent self-directed project.

- Developed backend services using **Java**, **Spring Boot**, and **REST APIs** for complete e-commerce operations — product management, inventory, cart, and order processing.
- Designed **MySQL** persistence layer using **Spring Data JPA** and **Hibernate** with clean separation of controller, service, and repository responsibilities.
- Applied structured REST API design and reusable backend components to support future application expansion; validated all workflows using **Postman**.

Tech Stack: Java • Spring Boot • Spring Data JPA • Hibernate • REST APIs • MySQL • Maven • Postman • Git

EDUCATION

B.E., Computer Science and Engineering
Agni College of Technology, Chennai

2019 – 2023
CGPA: 8.76 / 10
