SUMMARY — Java Backend Developer with around 3 years of experience in developing and maintaining enterprise applications using Java, Spring Boot, Spring Framework, Hibernate, JPA, RESTful APIs, and Microservices. Experienced in microservices architectures, CI/CD pipelines, and delivering production-ready solutions in agile, cross-functional teams.

TECHNICAL SKILLS

Programming Languages	: Java, SQL, JavaScript, Python.
Backend Frameworks	: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Security, JWT Authentication.
Frontend Technologies	: React.js, HTML5, CSS3, JavaScript, Bootstrap.
Database Technologies	: MySQL, MongoDB.
Concepts	: REST APIs, OOP, SOLID Principles, JDBC, JSP, Servlets, ORM, LOG4J
Microservices	: API Gateway, Open Feign, Web Client, Saga Pattern, Resilience4j, Rate Limiting, Microservices Architecture
Fundamentals	: Docker, Jenkins, GitHub Actions, Apache Tomcat, Jetty , Kafka ,AWS
Development Tools	: Eclipse, Visual Studio Code, Maven, Postman, Swagger/open API, SonarQube, Git, GitHub, TortoiseSVN, JUnit, Jira
Methodologies	: Agile, Scrum, Software Development Life Cycle (SDLC)

WORK EXPERIENCE

Java Full Stack Developer (DVARA KGFS Pvt Ltd, Chennai)

Jun 2023 - Sep 2025

- Developed and maintained backend modules using **Java, Spring Framework, and Spring Boot**, following clean and scalable architecture.
- Designed and implemented **RESTful APIs** for core business workflows, security, and reliability.
- Built and maintained microservices-based systems to support scalable and high-performance applications.
- Implemented business logic, validations, and system enhancements to meet evolving requirements.
- Improved system uptime and performance by identifying bottlenecks and resolving production issues.
- Developed and deployed web applications using **Servlets** on **Apache Tomcat** and Jetty servers.
- Designed and optimized **MySQL and MongoDB** schemas, focusing on data modeling and query performance.
- Worked in ticket-based development environments, collaborating closely with Business Analysts, QA teams, and developers to deliver business requirements.
- Worked extensively in **Development and Sandbox** environments using Jenkins for deployment validation, testing support, and release activities.
- Actively participated in SDLC and **Agile ceremonies**, including sprint planning, daily stand-ups, reviews, and retrospectives.
- Developed and maintained Spring Boot Microservices with Eureka Service Registry, Spring Cloud Gateway, and Config Server for centralized service management and configuration.

PROJECTS

Loan Processing System (JLG, Enterprise & Personal Loans)

Overview: A centralized NBFC loan management platform developed to manage customer onboarding, loan origination, approval, disbursement, repayment tracking, and portfolio monitoring. The system supports secure financial transactions, workflow automation, and scalable loan processing operations.

- Developed backend services using **Java, Spring Boot, Hibernate, and JPA** to support loan lifecycle management.
- Designed and developed **Spring Boot Microservices** Architecture using **Service Discovery** (Eureka), **API Gateway, Config Server, and Open Feign** for scalable and efficient Inter-Service Communication.
- Designed and implemented **RESTful APIs** for customer onboarding, KYC verification, loan applications, approval workflows, disbursement, and repayment tracking.
- Implemented **JWT-based authentication and authorization** using **Spring Security** to secure application APIs and user access.
- Developed business validation layers to enforce loan eligibility checks, approval rules, and repayment processing workflows.
- Integrated **third-party APIs** for customer verification, SMS notifications, and external business services.
- Designed and optimized **MySQL** and **MongoDB** database schemas.
- Utilized **Redis caching** to improve API response times and reduce database load for frequently accessed data.

Tools & Technologies: Java, Spring Boot, Spring Security, JWT, Hibernate, JPA, REST APIs, Redis, MySQL, MongoDB, Jenkins, Maven, Postman, Microservices, Eureka Service Registry, API Gateway, Inter-Service Communication.

Insurance & Collections System

Overview: An integrated platform developed to manage insurance enrollment, policy servicing, claims processing, collections tracking, repayment monitoring, and recovery operations within NBFC business workflows.

- Developed and maintained backend services using **Java, Spring Boot, Hibernate, and JPA** for insurance and collections-related business processes.
 - Developed and maintained **Spring Boot Microservices** with **Eureka Service Registry, Spring Cloud Gateway, and Config Server** for centralized service management and configuration.
 - Designed and implemented **RESTful APIs** to support policy servicing, claims processing, collection activities, repayment tracking, and integration workflows.
 - Implemented secure authentication and authorization using **Spring Security and JWT-based security mechanisms**.
 - Integrated multiple **third-party services** for customer verification, notification delivery, payment processing, and external business operations.
 - Collaborated with **cross-functional development teams** to implement, configure, test, and maintain service integrations across multiple applications.
 - Utilized **JPA, MySQL, and MongoDB** to optimize database queries and improve application performance.
 - Implemented Redis caching to reduce database load and improve API response times for frequently accessed insurance and collections data.
- Tools & Technologies:** Java, Spring Boot, Spring Security, JWT, Hibernate, JPA, REST APIs, Redis, MySQL, MongoDB, Jenkins.

EDUCATION

B.E Computer Science and Engineering

Agni College of Technology, Chennai (CGPA - 8.76)

2019 – 2023
